

# California Water Plan Update 2013

March 30, 2011

## Groundwater

### Objective:

Expand information about statewide and regional groundwater conditions in California Water Plan Update 2013 to better inform groundwater management actions and policies through compilation and summarization of data and analysis.

### Premise:

- ◆ Existing water laws and regulations are in place.
- ◆ No new data collection or detailed analysis.

### Deliverables:

- ◆ Compile groundwater information.
- ◆ Summarize groundwater conditions and management activity.
- ◆ Identify data gaps.
- ◆ Estimate change in groundwater storage.
- ◆ Conduct Case Studies.
- ◆ Inventory and describe potential for conjunctive management of groundwater and other supplies.
- ◆ Inventory and describe potential for groundwater banking and integrated flood management.
- ◆ Develop sustainability indicators.

### Schedule:

- |  |              |
|--|--------------|
| ◆ Revise Project Charter per Public AC feedback:             | Spring 2011. |
| ◆ Form Groundwater Caucus:                                   | Spring 2011. |
| ◆ Compile and summarize information, and identify data gaps: | Late 2011.   |
| ◆ Conduct analysis and prepare draft document:               | Spring 2012. |
| ◆ Refine analysis and document:                              | Spring 2013. |
| ◆ Finalize analysis and document:                            | Fall 2013.   |
